PROFILE

My name is Mohammed Inamul Hassan, and I'm a third-year B.Tech/IT undergraduate at Sri Sairam Engineering College. I enjoy picking up new skills and technology. I strive to improve as a programmer and a problem solver. My recent interests are Android App Development and simple UI designing. My personal portfolio website contains more information about me. Apart from my professional life, I enjoy cricket and football, as well as a popular pastime these days: gaming.

EXPERIENCE

Blunav Technologies Pvt Ltd

Jan 2023– Present

Application Development Intern

Worked on creating an API service with FastAPI with MongoDB as backend database and Collaborated with the front-end team for the creation of React Web App.

ACITVITIES

- Instructor in “Data Structures – Geek Series” conducted by SSEC GeeksForGeeks Student Chapter.
- “C Programming Bootcamp Trainer” at Sri Sairam Engineering College.

PROJECTS

- Working on Crack The CI, an application that can assist students in learning more about how an interview occurs.
- DrugEx, an Android application that allows the public to anonymously report drug trafficking to higher officials or to others who can pass on the information.
- Expenser, An Android app that manages the user's various expenses and stores the data in a Firebase database.
- Using the iTunes API, I created an iTunes Search Engine to render data from iTunes. This website displays any music from iTunes, along with the artist's name, year of release, and a link to purchase the song from iTunes.
- Created a Travel Blog application with search and sort functionalities that renders data from bitbucket.
